RE: Foxwoods Casino-Philadelphia / Edwards and Kelcey Review No. 2

Dear Mr. Donoghue:

In accordance with your request, we have completed our analysis of the comments brought forward by Edwards and Kelcey in their review letter dated November 1, 2006. As you know, Edwards and Kelcey was contracted to review the traffic engineering documents we prepared in support of the Foxwoods Application.

In general, the comments brought forward are each best addressed as the design of the facility progresses. On behalf of Foxwoods, we commit to continuing to work with PennDOT and their consultants, as well as the City of Philadelphia Department of Streets to address these issues. In addition, the project team has been meeting with various neighborhood and community groups and we commit to continuing this process as well.

Specifically, the letter itemizes areas of concern including railroad and utility coordination as well as the details of turning radii and the operation of traffic signals. Our plan is to address these issues immediately upon licensure by meeting with the City and PennDOT jointly and approving a work program.

We see the coordination of the traffic signals as more than just to improve traffic flow, we see an ITS application that not only manages our traffic variations but begins to address diversions from I-95 and events at the Sports Complex to our south. We see the intersection improvements as a priority, particularly given the PUC process.

Regarding the ramp, which is tied to Phase II, we see the need to scope a formal Point of Access Study at the earliest to enable it to progress as the Phase I improvements are implemented.

In summary, we appreciate the review effort of Edwards and Kelcey and pledge to address each as the design phase progresses. If there are any questions, please do not hesitate to call me.

Very truly yours,  
ORTH-RODGERS & ASSOCIATES, INC.
