

1. The cost proposal appears to be asking for a single price per each item listed (a price per county, per employer, etc.) and not based on any packages that may be requested. Is this way the PGCB is expecting to receive responses, as a price per search on this sheet? **We are looking for a price per item and not any package pricing and we are looking for a single price for all counties.**
2. If the above is the expectation is correct, how would the PGCB like vendors to comply with the question asking if the Board is looking for a price per county rate with an answer of 'no'? If not per county, what scope is the PGCB looking to use for pricing submissions under the County Criminal request in the pricing? **We are looking for one standard price for all county criminal searches.**
3. For employment checks, it was asked if it is a price per verification or a request to price for 5 years of employment verifications and it was answered to list out the cost for both. Can you confirm that the vendors are able to add an additional pricing tab to account for the accommodation of such and are to list a price for a single employment verification (to include the TALX (formerly Work Number) fees within the pricing? **We are looking for one cost for employment. No tabs should be added.**
4. Under International pricing, it was mentioned that the pricing could be leveled or by country, but it is not seen as to how to submit that pricing in the given cost document. Is this again pricing tabs that can be added? **We are only looking for pricing per each country listed on the Cost Submittal.**
