- 6-18” spacers in between units on the wall
- Jackpot processing room for Slot Attendants

High Limit Slots - Entry Portal

High Limit Slots - Floor Layout

High Limit Slots

Proposed Floor Reconfiguration Proposal

	Current Unit Count	Proposed Changes	Proposed Unit Count
Slots	1,967	-132	1,835
Total Tables	123	+2	125

- We are requesting approval to reconfigure our gaming floor. This plan will decrease our total slot count by 132 units, which have an average age of 12 years, while increasing our table game count by 2 units.
- As referenced previously, the proposed changes are designed to enhance the gaming experience for our players by introducing a new high-limit slot room, refreshing and expanding the high-limit table games room, and updating the VVIP Lounge.
- Our objective is to maximize gaming revenue by providing the best possible player experience.

Thank you
